

AppDetectivePRO

CERTIFIED AUDITOR TRAINING

Trustwave is committed to the success of its AppDetectivePRO clients. We are pleased to offer the Certified AppDetectivePRO Auditor (CADA) training course, which is designed to provide you with the fundamental knowledge to configure and operate AppDetectivePRO. The Certified AppDetectivePRO Auditor (CADA) designation provides evidence of your ability to perform database vulnerability assessments, configuration assessments and user entitlement reviews using the AppDetectivePRO solution.

Approach

Our approach is learning by doing. Our expert trainers provide an intensive and hands-on learning environment as well as engaging business cases that will provide you with the right insights to accelerate business. All participants will install and use AppDetectivePRO during the course to put newly gained knowledge into practice on the spot. There will be lots of opportunity to ask questions and exchange experiences with peer users and Trustwave's instructors.

After completing this course, participants will have a clear understanding of Trustwave's AppDetectivePRO solution, and operational methodology.

Participants will learn to use AppDetectivePRO basic and advanced functionality, and install, configure, and utilize all product features.

Participants will learn how to customize policies, checks, exceptions, and leverage built-in reporting capabilities. Participants will also learn how to review identified vulnerabilities and user privilege entitlements through reports.

Who Should Attend

Anyone who will be installing, configuring, or using AppDetectivePRO to conduct in-depth database security, audit, or regulatory compliance assessments. This would include:

- IT Auditors
- IT Advisors
- Security team members

Participants should have experience with software implementation, information security best practices, regulatory compliance requirements, and a basic knowledge of databases. Since the training is hands-on, there is a maximum of 5 participants per session.

Subjects

- AppDetectivePRO Implementation
- Sessions and Configuration
- Vulnerability Assessment
- Configuration Assessment
- Identify Access Assessment
- Frameworks and Policies
- Control Reviews, Reporting and Fix Scripts
- Advanced Troubleshooting

Duration

1 Day

Format

Instructor-Led Training Class

Prerequisites

Participants should have a basic knowledge of Databases and Security. A solid understanding of regulatory requirements and compliance regulations will enable the student to maximize their learning.

Skills Gained:

By the end of this course, participants should be able to perform the following tasks:

- Administer and configure AppDetectivePRO
- Perform database vulnerability assessments, configuration assessments, and identity access assessments.

Results

Participants will take the exam after the course is completed. The hands-on, practical skills/knowledge exam covers all aspects of the material. The exam includes AppDetectivePRO screenshots and real-life exercises using AppDetectivePRO.

Attendees who successfully complete the exam at the end of the course will receive a Certified AppDetectivePRO Auditor certificate, and will be entitled to use the CADA professional designation.

Locations

Training courses can be delivered on site, or via a remote web-based training session. Classroom training may also be available in your area. Computer-based training options are currently not available for this course.

Costs

\$2,000 per training class – Up to 6 participants (excl. travel, expenses, and taxes/VAT, where applicable). Please consult with your Trustwave Account Executive about training options and costs.
